Amendments to the Claims:

The following listing of claims replaces all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) In an automotive window glass having a ceramic color layer formed thereon, the automotive window glass being characterized in that a ceramic color layer is formed on an entire surface or part of the automotive window glass by using a ceramic color paste containing a green-color pigment in an amount of 30-80wt% relative to 100wt% of a total of a black-color pigment and the green-color pigment, and that, in an $L^*a^*b^*$ color system, a transmitted color of the glass has a value of a^* of -10.0 to 0.0, and a reflected color of the ceramic color layer, which is observed from a vehicle exterior side through the glass has $L^* \leq 30.0$, $-10.0 \leq a^* \leq 0$, and $-2 \leq b^* \leq 8$.

2. (Original) An automotive window glass according to claim 1, which is characterized in that the ceramic color paste comprises a low-melting-point glass frit and a pigment.

3. (Currently Amended) An automotive window glass according to claim 1 ~~or claim 2~~, which is characterized in that a ratio of the low-melting-point glass frit to the pigment is about 80:20.

4. (Currently Amended) An automotive window glass according to claim 1 ~~to claim 3~~, which is characterized in that the black-color pigment comprises a mixture of chromium oxide, copper oxide and manganese oxide.

5. (Currently Amended) An automotive window glass according to claim 1 ~~to claim 4~~, which is characterized in that the green-color pigment comprises chromium oxide.

6. (Currently Amended) An automotive window glass according to claim 1 ~~to claim 5~~, which is characterized in that the green-color pigment is in 60-80wt% relative to 100wt% of the total of the black-color pigment and the green-color pigment.

7. (Currently Amended) An automotive window glass according to claim 1 ~~to claim 6~~, which is characterized in that a pigment component of the ceramic color layer consists of the black-color pigment and the green-color pigment.
